Jakarta have a torrential rain

Jakarta – Extreme weather has coming. Yesterday, 5th October 2010, Jakarta is had a torrential rain which lasted in two hours, with some thunder strikes often. After two hours, the rain isn't stopped, but in low intensity. In South Jakarta near 7D Protectorate, the river going up and made a flood of 10 cm, in other places may be various between 5 to 15 cm. In State of Southall, the rain is in low intensity but lasted long. Same as Southall, State of Dalnik is having the rain in low intensity but lasted long. Luckily this two states has no potential to have a flood. Tommorow maybe have a torrential rain again because the extreme weather would be end in February 2011.

Shocking picture of Jakarta flood last year.
